

# Endnote Web - Capturing Citations

There are 2 main ways to get citations into [MyEndnoteWeb](#): one is to hand-enter them yourself; the other is to import them from one of the research databases.

There is a [Firefox toolbar](#) you can install to assist in importing citations and some [Chrome & Safari Extensions](#) as well.

## Importing from databases

Many library subscription databases available through the web can export citations either directly into EndnoteWeb or indirectly, by exporting a citation file that you then upload into Endnote web.

## Exporting Directly from a Database into MyEndnoteWeb

Many of our databases come from a vendor (Ebsco) that has a direct export to Endnote Web. Drew ScholarSearch is one of those databases!

- [Using the export to EndnoteWeb function in Ebsco databases](#)

## Exporting to a File and Uploading to EndnoteWeb

Some database products don't have a direct export-to-EndnoteWeb option. For them, you will need to Export a list of your citations and Import them into Endnote web. If you use the [Mozilla Toolbar for Endnote Web](#), the process skips a few steps.
