

Connecting to drew1x Wireless Network with an Android Device

These instructions will help you connect your Android device to the secure drew1x network. Once you've gone through this process one time, your settings will be saved and you won't need to do it again.

1. Configure the drew1x connection on your Android device
 - a. Navigate to the settings screen where you select your wireless network
 - b. If you have not tried to connect to drew1x before, simply select "drew1x" from the list, and the configuration page will come up. If you have previously connected, long-press on the drew1x network to bring up the menu, then select "modify network"
 - c. Use the following parameters:
 - i. EAP Method: select **PEAP**
 - ii. Phase 2 Authentication: None
 - iii. CA Certificate: (unspecified)
 1. if this is not an option for you, choose "Do not validate"
 - iv. Identity: enter your Drew username
 - v. Anonymous Identity: leave this blank
 - vi. Password: Your Drew uLogin password
 - vii. Select "Save" to save your settings.
2. Connect to the drew1x network by selecting the drew1x network and choosing "Connect"
3. Just so that you are aware, there is an attachment "Drew_Public.cer" which is the certificate that is needed, download it to your smart phone and save it, and when prompted for a certificate, it should appear in the drop down list. The certificate can be downloaded by clicking the icon below.
