

National Cyber Security Awareness Month

October is National Cyber Security Awareness Month (NCSAM), an entire month devoted to educating the public about cyber security.

NCSAM is run and organized by the [National Cyber Security Alliance \(NCSA\)](#).

Drew University is one of many schools, businesses, and individuals signed up to be champions of cyber security awareness and education, dedicated to promoting a safer, more secure and more trusted Internet. You can find a [list of champion organizations online](#).

Security Quiz

Take this online security quiz to see what you need to learn more about. (Some of the questions are designed for a younger audience, but still have valuable information in the answers!)

Or download the quiz: [STOP. THINK. CONNECT. Online Safety Quiz.pptx](#)

Security Resources

SANS Newsletters

These newsletters cover myriad security topics and are only 3 pages in length. Visit the [newsletter archives online](#) to find the topic that most concerns you.

For example, if you are interested in learning more about [Securing Your Home Network](#), you can view, download or print the [February 2016 OUCH! newsletter](#).

STOP. THINK. CONNECT.

Another valuable resource is <https://stophinkconnect.org/>. This initiative reminds you to consider what you are doing online in order to keep yourself, your information, and your devices safe.

You will find [Tips & Advice](#) on their website, as well as print and video [Resources](#).

Here are some of our favorites:

- [Basic Tips and Advice \(pdf\)](#)
 - Keep a Clean Machine
 - Protect Your Personal Information
 - Connect with Care
 - Be Web Wise
 - Be a Good Online Citizen
 - Own Your Online Presence

- [Ransomware Tips and Facts \(pdf\)](#)
- [Top Online Privacy Tips \(video\)](#)
