"Account not configured" error in Citrix Workspace

If you've either installed Citrix Workspace or upgraded from Citrix Receiver, you may have seen the following error message when trying to open an application.

This can prevent you from opening applications that you need to use.

How to stop this from occurring:

1. In the system tray (bottom right hand corner of your screen), right-click on the Citrix Workspace icon. Note: You may have to expand the system tray completely to see the icon.

2. From the menu, select Advanced Preferences.

3. Select Reset Citrix Workspace and confirm that you want to reset in the pop-up window. Be sure that you are not using CloudPC before you follow this step.

Oitrix Workspace			_	×

Connection c Shortcuts an Citrix Worksp Configuratio Delete passw Citrix Casting	enter 1 Reconnect ace Updates 1 checker ords	High DPI Keyboard and Language bar Data collection Reset Citrix Workspace Support information Citrix Files		
About				
Version	19.11.0.50(1911) © 2019 Citrix Syst Third Party Notic	ems, Inc. All Rights Reserved. es		

4. After you reset, you will see a window to add an account. You can put your Drew email address in here and check the box to have the window not show up on subsequent logins.

Otrix Workspace	×
Add Account	
Enter your work email or server address provided by your IT department:	
Do not show this window automatically at sign-in.	
Add	Close

5. You can continue to login normally at this step and Workspace will open normally.
